Wilkhahn

Decide.

Decide.

It was when the new normal prompted the dawn of hybrid work styles at the latest that offices finally became hubs of everything made possible or difficult by remote working. Nowadays, offices are places where people meet, talk, learn, interact, gain information, and take decisions. Conferences and meetings take place in all departments and hierarchies. Because these events are held on the days everyone's physically in the workplace, the time spent sitting down increases. And requirements of sitting ergonomics increase. In response to office environments' changing needs, Wilkhahn has developed a conference chair range called Decide.

Wilkhahn's Decide task chair range combines stylish, timeless design with the company's award-winning expertise in healthy, ergonomic sitting. Of which the chair's innovative 3D suspension is a typical example. It stimulates healthy movement without the need for mechanical parts. The large range of models allows custom configuration to spaces, functions and corporate design. It goes without saying that Decide meets Wilkhahn's high standards in terms of durability and sustainability.

Design: Wilkhahn

The wide choice of models and features makes the chair ideal for meeting and conference spaces throughout organizations. Matching the chair perfectly to the corporate design is also no problem.

Task chair model 296/5

The chair's timeless, crisp look and high-quality craftsmanship make it a true allrounder in contemporary office environments. In other words, spaces where flexibility, comfort and aesthetics are equally important.

Task chair model 296/5 at a Versa table 638/51

The models with contoured upholstery stand apart for their distinctively top-stitched sections. They structure the seat and backrest stylishly and are signs of first-class craftsmanship. The look and feel of the generous, breathable material means exceptional and pleasant comfort.
Models 296/41, 296/51 and 296/61:

With very few components and lots of features, finishes and covers, Decide adapts easily to requirements. For instance, it can upgrade simple working environments to corporate offices, or even transform alternative workspaces throughout.

Decide. Backrest contours.

Decide's design combines blends clear geometries with outstanding comfort and support. These aspects are achieved via the ergonomic curve in the lumbar support and the comfortable upholstery of the seat and backrest shell. The models with medium-high and high backrests have sewn-in clamps to provide different support zones.

Decide. Armrests.

The standard and ring-shaped armrests provide comfortable 4-cm-wide armrest pads to reflect contemporary requirements. Their design and position allow plenty of freedom to move at the table.

Armrest, coated black with a textured matte finish

Armrest, high-luster polished with embedded armrest pad made of black, through-dyed plastic

Armrest, high-luster polished with embedded, leather-covered armrest pad

Ring-shaped armrest, coated with a black textured matte finish

Ring-shaped armrest, high-luster polished with embedded armrest pad made of black, through-dyed plastic

Ring-shaped armrest, matte polished with embedded, leather-covered armrest pad

Ring-shaped armrest, coated with a white textured matte finish and embedded armrest pad made of solid oak

Decide. Mechanics.

Decide offers outstanding comfort and support due to its precision-adjustable height, elastic and ergonomically shaped backrest as well as comfortable upholstery with different support zones. The models with innovative, three-dimensional suspension made of special high-performance steel are particularly stylish. This material, used for the first time in the furniture industry, enables the flexibility and stability required for stimulating 3D movement without the need for mechanical parts. In areas where more dynamic seating is required, a rocking mechanism, whose counter pressure can be custom-adjusted via conveniently placed pull-out levers, ensures a healthy change of posture.

Decide. Overview of models.

296/1 Four-star base
precision-adjustable height,
standard height backrest

296/1 Four-star base
precision-adjustable height,
medium-height backrest

296/3 Four-star base
precision-adjustable height,
high backrest

296/4 Five-star base
precision-adjustable height,
standard height backrest

296/5 Five-star base
precision-adjustable height,
medium-height backrest

296/6 Five-star base
precision-adjustable height,
high backrest

Decide. Overview of models.

296/11 Four-star base
precision-adjustable height,
standard height backrest with
contoured upholstery

296/21 Four-star base
precision-adjustable height,
medium-height backrest with
contoured upholstery

296/31 Four-star base
precision-adjustable height,
high backrest with contoured upholstery

296/41 Five-star base
precision-adjustable height,
standard height backrest with
contoured upholstery

296/51 Five-star base
precision-adjustable height,
medium-height backrest with
contoured upholstery

296/61 Five-star base

Decide. Technical details.

The durable conference chair fuses superior comfort with crisp design, a top quality appeal plus a wide range of models. Combined with the adjustable rocking mechanism, the shell shape of the backrest in particular means that the chair supports ergonomic dynamic sitting. Otherwise, an innovative, particularly attractive, three-dimensional rocking spring stimulates healthy movement without any mechanical parts. Three backrest heights, two frame variants, as well as two types of armrests and a wide range of upholstery materials ensure a wide spectrum of uses and design options for meeting spaces to boardrooms.

Base frame

Models 296/1, 296/2 and 296/3
Four-star, die-cast aluminum base, optionally coated with a silver satin finish, black or white with a textured matte finish, or high-luster or matte-polished. A DIN EN1335 – 1 compliant gas lift for precision-adjustable sitting heights, black, or optionally chrome-plated when coated white with a textured matte finish or high-luster polished star base. Optionally with swivel-return mechanism, which then means only a fixed seating height of 450 mm (always with chrome-plated swivel-mounted column).
Multipurpose glides made of black plastic for all types of flooring, on request with an extra felt insert (please state when ordering). Optionally with base glides with a larger contact area made of black polyamide for all types of flooring. For wooden flooring (e.g. parquet) please order with an extra felt insert.

Both frame variants as a standard with a three-dimensional rocking mechanism made of springy high-performance steel coated in black or white with a textured matte finish or a silver satin finish. Lever made of steel coated black, made of white coated steel when the star base is coated white with a textured matte finish.

Optionally with a rocking mechanism with customized weight adjustment, mechanism shell made of aluminum, coated black, optionally polished when the star base is white with a textured matte finish or high-luster polish, with the top cover made of black polypropylene. Black polyamide lever for precision-adjustable height.

Models 296/4, 296/5 and 296/6
Five-star, die-cast aluminum base, optionally coated with a silver satin finish, black or white with a textured matte finish, or high-luster or matte-polished. A DIN EN1335 – 1 compliant gas lift for precision-adjustable sitting heights, black, or optionally chrome-plated when coated white with a textured matte finish or high-luster polished star base. Ring-type casters with load-dependent braking as a stylish, axleless version, made of DIN EN12529 compliant black polyamide as the standard version for carpets; with gray polyurethane tire for hard flooring.

Seat and backrest
Unitary seat and backrest shell made of FSC®-compliant, molded plywood, covered with polyurethane molded foam. Unitary covers with double saddle stitching, held in place with clamps in the cushions, replaceable.

Optionally with soft padding in the seat and extra cut foam added.

Armrests
Standard and ring-shaped armrest made of die-cast aluminum, surface the same as the frame design.
Optionally with embedded armrest pad made of black, through-dyed polycarbonate, leather-covered armrest pad when the chair has fabric covers in black leather 74/99, color-matched with leather covers, or in the case of a ring-shaped armrest, with an integrated armrest pad made of solid oak, with a natural varnished finish or stained black and varnished (please state on order).

Standards
The Decide conference chairs comply with the DIN EN 16139, DIN EN 1728 and ANSI/BIFMA X5.1 standards.

Wilkhahn and sustainability.

In over 100 years of its corporate history, Wilkhahn can look back on a sustainability philosophy that has grown over decades. Aspects such as durability, social fairness, environmental responsibility and cultural orientation have been evolving as corporate principles since the 1950s. Wilkhahn today is regarded internationally as a model of excellence, not only on account of its products but also because of its modern corporate philosophy. This is because the company realized early on that sustainable design should embrace environmental aspects, improve social relationships and define the cultural role of a company. This approach to the way we do business creates a bond between us and our customers throughout the world. There is surely no more rewarding task than working together for a successful future that is worth living in.
