JUL

Plus Design / 2023

The Nicola Cacco designed JUL executive chair brings a touch of avantgarde modernity as well as sophistication also to managerial settings. Its forms are sleek but, thanks to great attention to detail, along with the feature creasing on the upper part of the backrest and tailcoat effect behind, richness and unique exclusivity are guaranteed. This results in a contemporarily innovative style, whilst at the same time retaining elegance and grace. The JUL armchair collection includes a frame with anatomical body support, thereby promoting a work concept that focuses on users' well-being through correct and healthy posture.
