

NEN SIDEBOARD

3022-SIBO

NEN approaches storage as an architectural act. A grounded timber base supports an inset upper volume, creating the continuous shadow line that gives the collection its quiet identity. Metal handles reinforce the symmetry of the facade while keeping its horizontal calm.

The design reveals itself in layers. Its restrained outer volume establishes a calm presence within the room, while the interior opens into a lighter, carefully organised space designed for everyday objects. Rather than opposing one another, the two complete the collection's understanding of harmony: restraint in appearance, generosity in experience.
